Tool Execution Failures TOOL EXECUTION (13 failures)

1. Noor_AI_aqaba

Production • 72.2s

Question: Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'internal error'): Data Summary - Clipping-loss calculation failed due to an internal error: `calculate\_clipping\_or\_curtailment\_losses()` got an unexpected keyword argument 'reactive_col'` - Reliable per-inverter clipp

The screenshot shows the AEPCCO AI Chat interface. At the top, the AEPCCO logo is visible, along with navigation tabs for AI Brain, Job Car..., Mainten..., Chat, and Teams. The Chat tab is active. The main content area displays a message from the AI:

got an unexpected keyword argument
'reactive_col'
- Reliable per-inverter clipping-loss values
cannot be provided at this time

Data Quality Note

- The clipping-loss tool is currently failing for
this plant/query
- No trustworthy clipping-loss metrics are
available until the underlying issue is resolved

Visualization

- The visualization for "Clipping loss for each
inverter over the last 2 months" has been
prepared

04:07 PM

2. KUPCO_HQ_DAJEEJ

Production • 56.6s

Question: Please figure out how much clipping loss was found in the last 6 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'internal error'): Clipping Loss Breakdown (Last 6 Months) - No clipping loss values could be calculated. - The clipping-loss tool encountered an internal error (unexpected-argument), so no per-inverter breakdown i

3. KUPCO_HQ_DAJEEJ

Production • 41.5s

Question: Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'internal error'): Clipping Loss Summary (2026-06-02 to 2026-08-02) Data Quality Notes: - The `clipping-loss` calculation tool encountered an internal error (`reactive\_col` unexpected argument) and could not return numeric results

The screenshot shows the AEP CO2 AI Chat interface. The header includes the AEP CO2 logo and navigation tabs: AI Brain, Job Card, Maintenance, Chat (selected), and Teams. The main content area displays a chat history with a message from the AI:

- The `clipping-loss` calculation tool encountered an internal error (`reactive\_col` unexpected argument) and could not return numeric results.

- No reliable inverter-by-inverter clipping loss values are available for this period.

Inverter Breakdown:

- inverter1: no data returned
- inverter2: no data returned
- inverter3: no data returned

Visualization:

- A line chart showing clipping loss per inverter over the last two months has been prepared, but it contains no data due to the calculation error.

4. Galleria_Mall

Production • 65.9s

Question: Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'internal error'): Clipping Loss by Inverter — Last 2 Months Data Quality Notes: - Unable to calculate clipping loss due to an internal error in the clipping-loss tool. - Error detail: calculate_clipping_or_curtailment

The screenshot displays the Galleria_Mall AI chat interface. At the top, the AePCO logo is visible, along with navigation tabs for AI Brain, Job Card, Maintenance, Chat (active), and Teams. A blue banner at the top contains the user's query: "Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well". Below this, a chat bubble from the AI assistant is shown, titled "Clipping Loss by Inverter — Last 2 Months". The bubble contains the following text:

Data Quality Notes:

- Unable to calculate clipping loss due to an internal error in the clipping-loss tool.
- Error detail: calculate_clipping_or_curtailment_losses() got an unexpected keyword argument 'reactive_col'

Visualization:

- The visualization has been prepared.

04:59 PM

Are you satisfied with the answer?

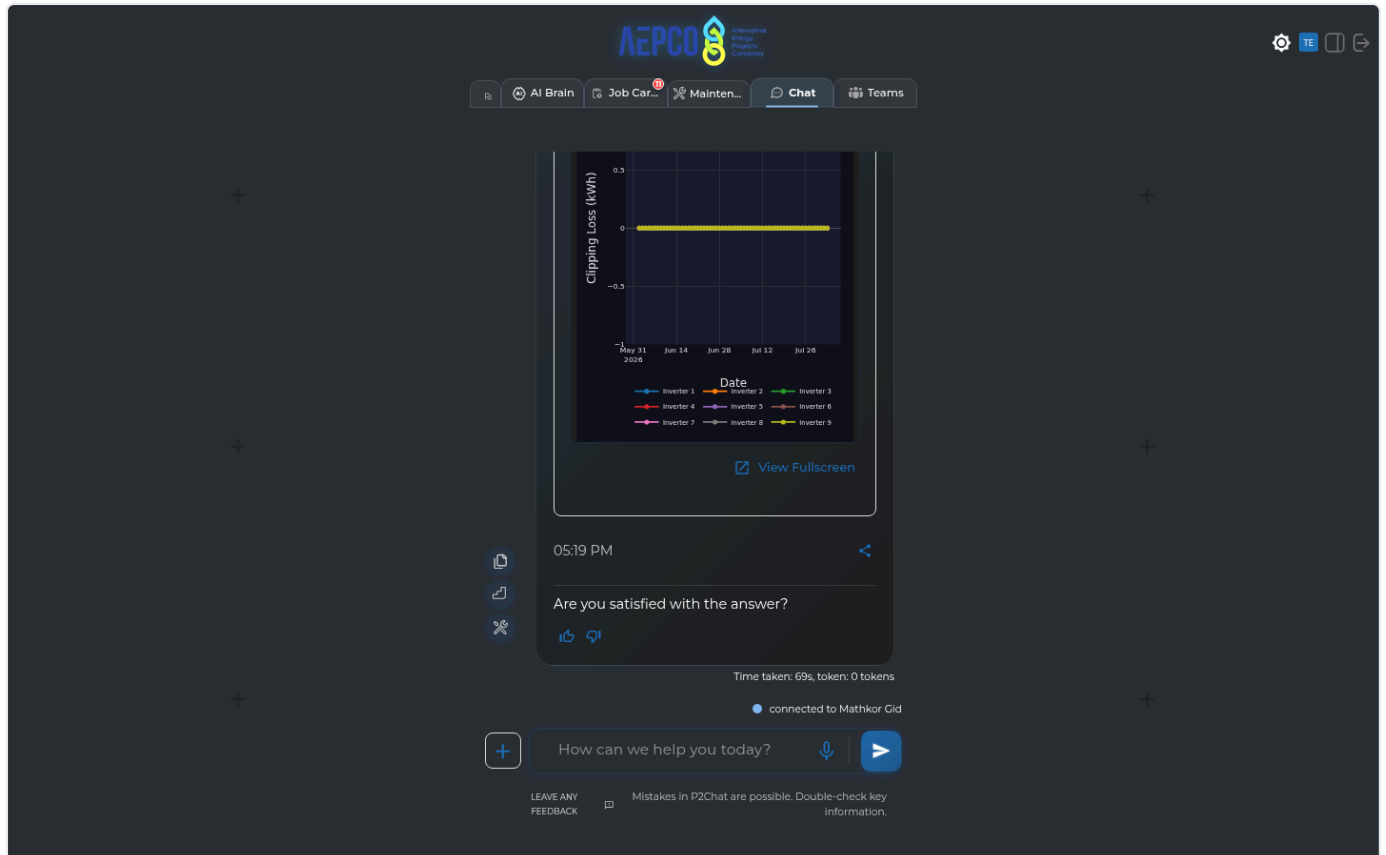

Below the chat bubble, a status bar indicates "Time taken: 50s, token: 0 tokens" and "connected to Galleria Mall". At the bottom, there is a text input field with the placeholder "How can we help you today?", a microphone icon, and a send button. A footer note at the bottom left says "LEAVE ANY FEEDBACK" and a disclaimer at the bottom right states "Mistakes in P2Chat are possible. Double-check key information."

5. GID

Production • 84.2s

Question: Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'failed to'): The clipping-loss tool failed to return any values for the requested period. No inverter-level clipping-loss figures are available due to an internal error: - Error: calculate_clipping_or_curtailme

6. Abdali_Mall_Netmetering

Production • 50.4s

Question: Please figure out how much clipping loss was found in the last 6 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'tool error'): - Clipping Loss Calculation (Last 6 Months by Inverter): • Calculation could not be completed due to an internal tool error; no clipping-loss values were returned for any of the 15 inverters. - Vis

The screenshot displays the AEP CO chat interface. At the top, the AEP CO logo is visible, along with navigation tabs for AI Brain, Job Card, Maintenance, Chat, and Teams. The Chat tab is active. A user query is shown in a blue bubble: "Please figure out how much clipping loss was found in the last 6 months broken by inverters, list them down and plot it as well". The AI response is in a white bubble and contains the following text:

- Clipping Loss Calculation (Last 6 Months by Inverter):
 - Calculation could not be completed due to an internal tool error; no clipping-loss values were returned for any of the 15 inverters.
- Visualization:
 - A graph titled "Clipping Loss per Inverter – Last 6 Months" has been prepared.

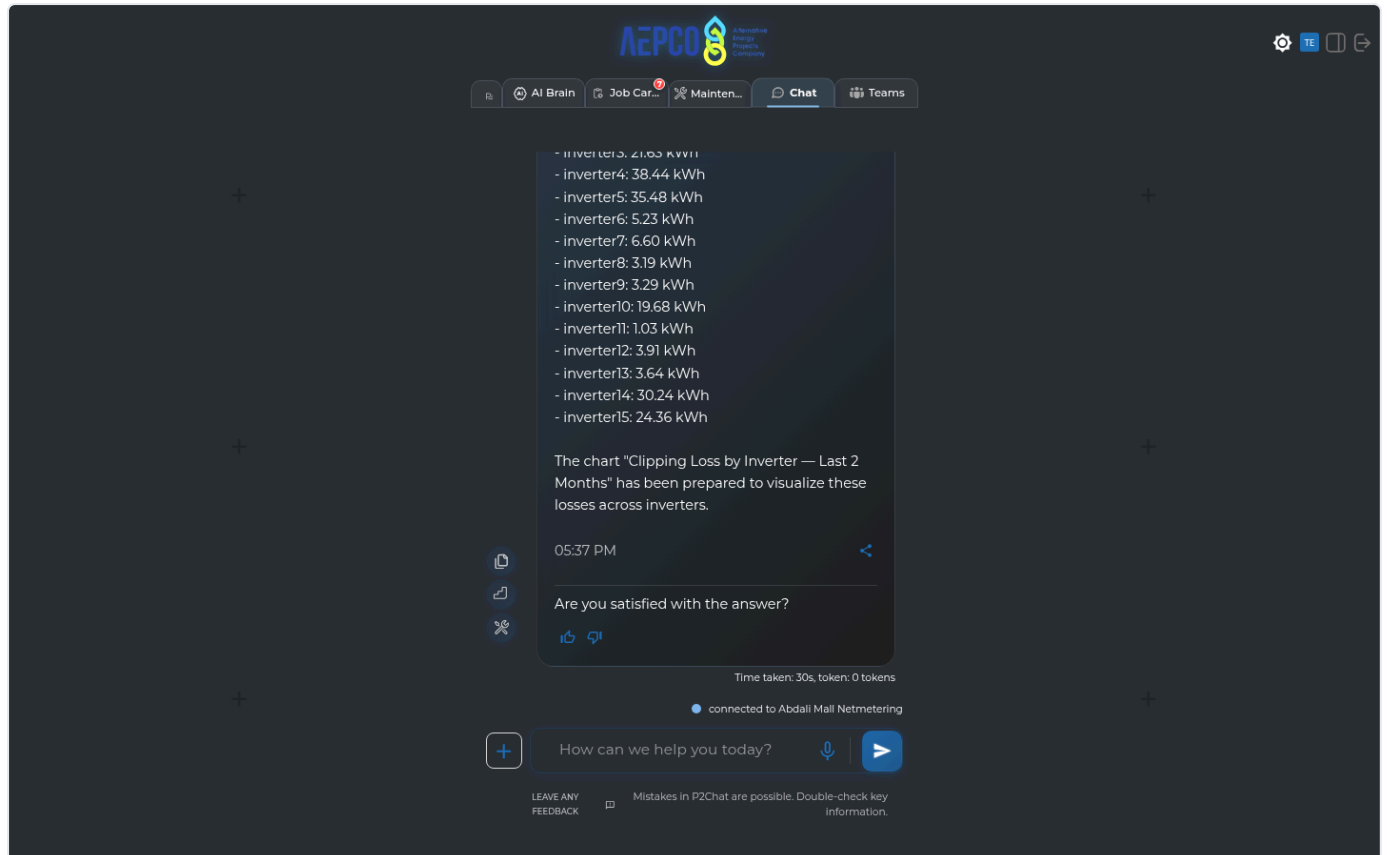

The response also includes a timestamp of 05:29 PM and a follow-up question: "Are you satisfied with the answer?". Below the chat window, there is a status bar indicating "connected to Abdali Mall Netmetering" and a footer with feedback instructions: "LEAVE ANY FEEDBACK" and "Mistakes in P2Chat are possible. Double-check key information."

7. Abdali_Mall_Netmetering

Production • 44.6s

Question: Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'tool error'): Clipping Loss Summary — Last 2 Months (2026-06-02 to 2026-08-02 17:25) Estimated directly from inverter power time series after the dedicated clipping-loss tool errored: - inverter1: 38.26 kWh - inv

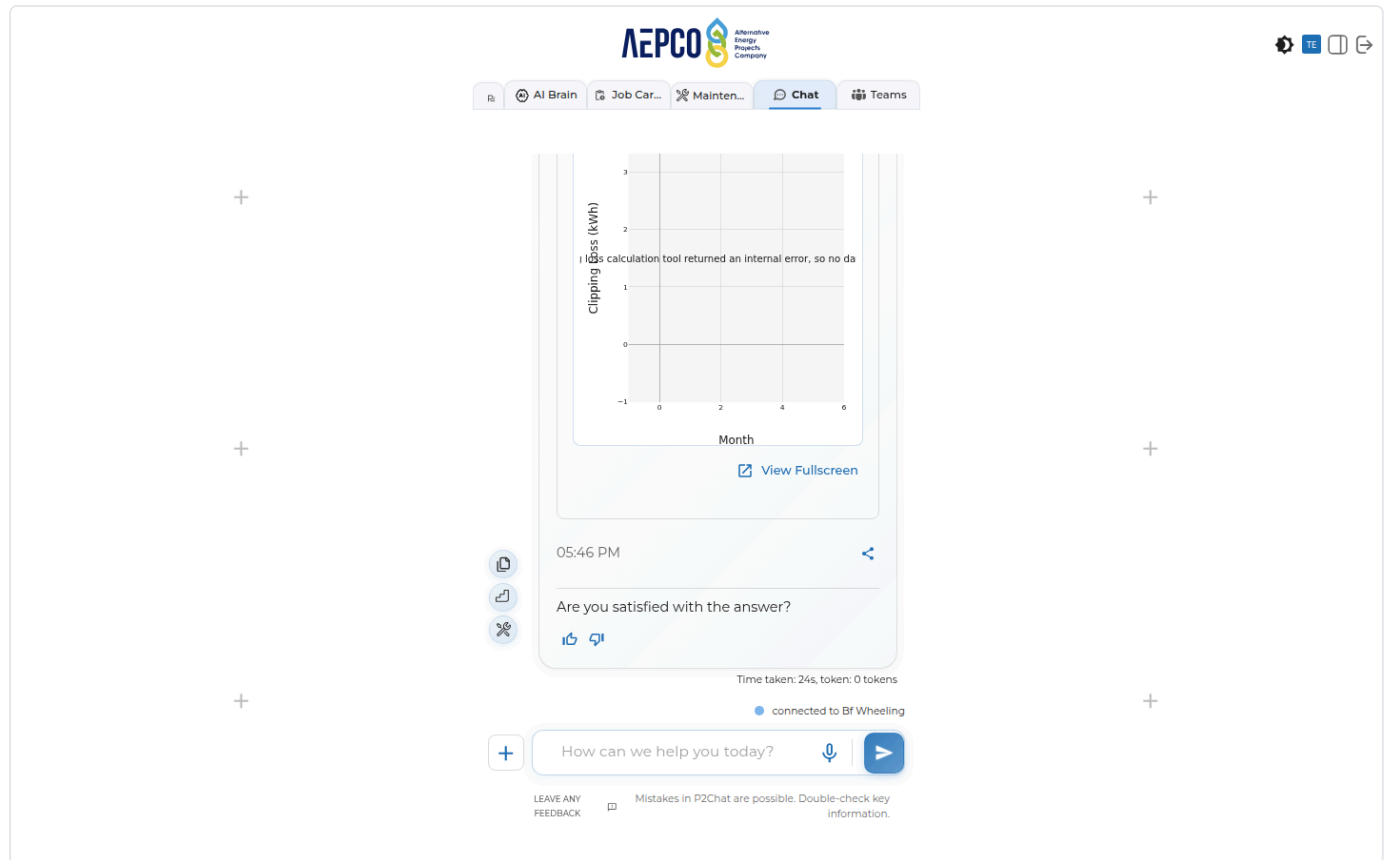

8. BF_Wheeling

Production • 39.8s

Question: Please figure out how much clipping loss was found in the last 6 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'internal error'): Clipping Loss by Inverter (Last 6 Months) Data Summary: - Clipping loss calculation could not be completed due to an internal error. • Error encountered: calculate_clipping_or_curtailment_loss

9. BF_Wheeling

Production • 46.1s

Question: Please figure out how much clipping loss was found in the last 2 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'unexpected keyword argument'): Here's the summary of the clipping-loss analysis for the last two months: - Plant has 6 inverters - No clipping-loss values were returned due to an internal calculation error Data quality note

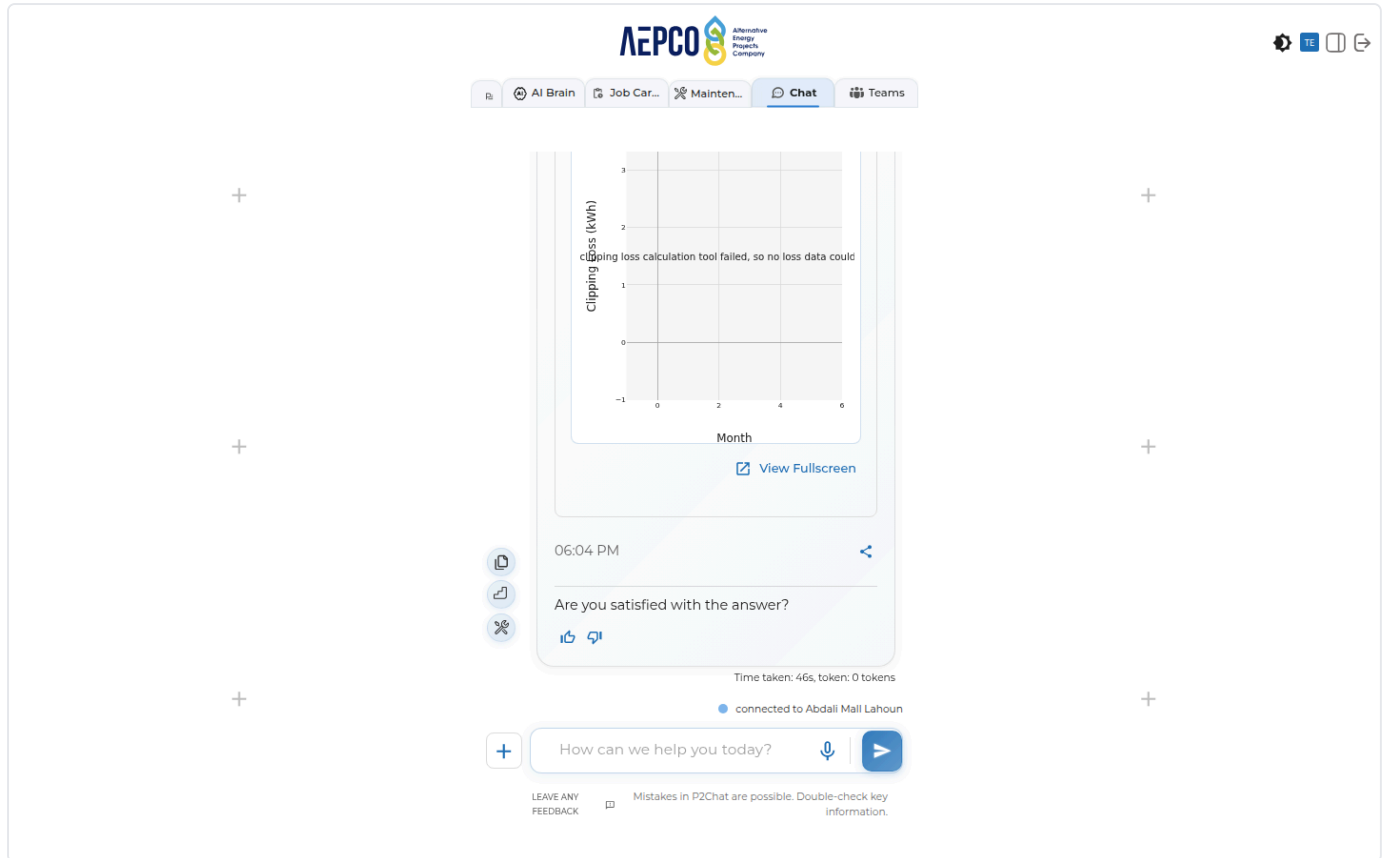

10. Abdali_Mall_Lahoun

Production • 61.4s

Question: Please figure out how much clipping loss was found in the last 6 months broken by inverters, list them down and plot it as well

Error reason: AI indicated failure (matched 'tool error'): Summary of Clipping Loss (Last 6 Months) Data Availability and Quality - Clipping-loss calculation tool failed internally for this plant and time range - Error encountered: unexpected argument

11. Abdali_Mall_Lahoun

Production • 17.1s

Question: Please generate December 2025 performance report

Error reason: AI indicated failure (matched 'tool error'): AI Brain Job Cards Maintenance Chat Teams Active Power is 441289.22W Wind Speed is 4.05m/s Weather Temperature is 35.67°C Last updated: 8/2/2026, 05:25 PM 05:57 PM Good afternoon. How can

The screenshot displays the AEP CO2 AI Chat interface. At the top, the AEP CO2 logo is visible, along with navigation tabs for AI Brain, Job Car..., Mainten..., Chat, and Teams. The Chat tab is currently active. A confirmation message states: "You're about to add a cleaning log. Please confirm the details below." Below this, a green box indicates "Maintenance record created" with a checklist of details: Date (2026-08-02), Site (Abdali_Mall_Lahoun), Fault Cause (Routine cleaning), Action Taken (Jim cleaned the pyranometer), and Status (Completed). The time 06:07 PM is shown. Below the confirmation, a question asks "Are you satisfied with the answer?" with thumbs up and down icons. At the bottom, a chat input field contains the text "Please generate December 2025 performance report" and a send button. A status bar at the bottom indicates "connected to Abdali Mall Lahoun" and includes a feedback link.

12. Abdali_Mall_Lahoun

Production • 30.9s

Question: How did my plant perform yesterday?

Error reason: AI indicated failure (matched 'tool error'): Yesterday (2026-08-01), the plant's key performance metrics were: - Total energy produced: 5,489.64 kWh - Performance ratio (PR): 0.7753 - Specific yield: 6.9843 kWh/kWp - Reference yield (Yr

The screenshot shows a chat interface for AEP CO2. At the top, there's a navigation bar with icons for AI Brain, Job Car..., Mainten..., Chat (selected), and Teams. The chat area displays a message from the AI:

- Specific yield of 6.98 kWh/kWp is consistent with a strong production day.
- Reference yield was 7.27 kWh/kWp, so the gap between available solar resource and delivered specific yield was about 0.28 kWh/kWp.

Notes:

- I could not provide technical/contractual availability because that tool failed for this request.
- I also could not provide performance index because that tool errored on this request.
