

Test Run Report — Run #166

Environment: Development • Website: aepec2-dev.p2agentx.com • Trigger: Manual • Started: Aug 17, 2026 05:36 • Ended: Aug 17, 2026 05:53
Generated: 8/17/2026, 6:07:12 AM

Summary

Failures (1)

Failure Cluster	Category	Failures
Tool Execution Failures	Tool Execution	1

Tool Execution Failures TOOL EXECUTION (1 failure)

Question: Use 'clipping_loss_via_requests' in order to calculate clipping loss if any for July 2026

Error reason: AI indicated failure (matched 'internal error'): I couldn't complete the clipping loss calculation for July 2026 using the available clipping-loss tool because the backend request failed with an internal error in the digital twin step: `unsupported`

TECHNICAL EVIDENCE

API call: GET /testuser2/ai_agent_chat → 200

Raw API response:

      "functions.query_plant_details_ag"
    ],
    "urls": [],
    "steps": "Step 1:\\n1. I get your question about a specific plant detail, like 'power(kW AC)'.\\n2. I open the plant's metadata dictionary, which has all the system information.\\n3. I go to the 'System' section in the metadata, where the main plant details are kept.\\n4. I look for the 'power(kW AC)' field in that section.\\n\\nStep 2:\\n1. I select data from July 1, 2026, to July 31, 2026, including both dates.\\n2. I find all valid inverter power columns in the dataset, leaving out reactive power and flag columns.\\n3. I check that the chosen power columns are actually in the dataset.\\n4. I clean up the plane of array (POA) irradiance data by filling in missing values using a diurnal method to keep the data accurate.\\n5. For each inverter power column, I calculate losses by finding the absolute difference between the measured power and the inverter's rated AC power during times when losses are detected.\\n6. I spot clipping events using both a machine learning method (rdtools XGBoost clip filter) and a threshold rule, flagging power above 85% of the rated AC power.\\n7. I convert the detected power losses into energy lost (kWh) by multiplying by the time interval (0.0833 hours).\\n8. I group the loss energy values by month (or by day, month, or year) for each inverter.\\n9. I add up the grouped values to get a single total loss value for each inverter during the period.\\n10. I organize the results into a DataFrame, with inverters as columns and the aggregation periods as rows.\\n11. I return the results as a dictionary, either by aggregation period or as a single total, depending on the settings."
  }
}
```

The screenshot displays the AEP CO AI Chat interface. At the top, there's a navigation bar with icons for Home, AI Brain, Job Card, Maintenance, Chat (active), and Teams. The main chat window shows a message from the user asking about clipping loss. The AI response provides specific data for three inverters and a total clipping loss. Below the response, there are links for Source, Steps, and Tools. The interface also includes a feedback section at the bottom with a plus icon, a search bar, and a microphone icon.

The screenshot displays the AEP CO P2Chat web application. At the top, there's a navigation bar with the AEP CO logo (Alternative Energy Projects Company) and several utility icons. Below the navigation bar, a horizontal menu contains options like "AI Brain", "Job Car...", "Mainten...", "Chat" (which is active), and "Teams".

The main chat area shows a message from the system providing energy consumption data for four inverters:

- inverter3: 7,798.30 kWh
- inverter4: 4,130.33 kWh
- inverter5: 3,688.40 kWh
- inverter6: 2,773.85 kWh

The total consumption is listed as 33,349.24 kWh, and the status is "Good". The timestamp is 08:48 AM.

Below the message, there's a prompt: "Are you satisfied with the answer?" followed by thumbs up/down icons. Three links are provided: "Click here for Source", "Click here for Steps", and "Click here for Tools".

At the bottom of the chat window, it says "Time taken: 23s, token: 0 tokens" and "connected to Abdali Mall Lahoun".

The input area at the very bottom has a plus icon, a text field containing "How can we help you today?", a microphone icon, and a send button (arrow icon).

Footer text includes: "LEAVE ANY FEEDBACK" and "Mistakes in P2Chat are possible. Double-check key information."
